

MIL-I-45208

INFLO Technique inc., a custom contract manufacturer of valves, is compliant with MIL-I-45208 inspection system requirements.

The MIL-I-45208 specification provides standards for the inspection systems of those who contract for the U.S. Army, Navy, Air Force and Defense Supply departments. It is approved by the U.S. Department of Defense.

In accordance with MIL-I-45208, INFLO Technique Inc. ensures that:

- Inspection systems are implemented to verify that all supplies meet the specified contract requirements.
- Detailed records of inspections and tests are systematically maintained.
- All contracts are subject to evaluation and audit by government representatives to ensure ongoing compliance and quality assurance.

INFLO Technique Inc. is committed to upholding these standards to deliver superior quality and reliability in every product we manufacture.
